CULLEN WINES

MARGARET RIVER

Cullen Vineyard, with its land, vines, wines and people... is my life's work. Over the 3 decades of working at Cullen the love for Cabernet Sauvignon has deepened. Planted in 1971, it is the heart and soul of what we do at Cullen.

This wine of the 2016 vintage is a tribute to the land and the vines it came from. Pure expression of a great year. No additions of yeast, acid, malolactic culture nor fining. The wines grown on these ancient soils are certified biodynamic, carbon neutral and powered naturally by solar power.

The fruit was sourced from 100% old vines on Cullen Vineyard.
Crop level at 3.8 tons per hectare and it is a 100% Cabernet Sauvignon picked on the 9th of March 2016 which was a new moon Flower day. A solar eclipse was taking place as well as being moon opposite Jupiter.

The fermentation of both primary and malolactic was natural.
The wine spent 86 days in terracotta amphorae before being basket pressed direct to 4 barrels. All of the wine was aged in French oak for 6 months, of which 75% were new. The Alcohol is 12.5%

1080 bottles made
