2021
D'ALOISIO CHARDONNAY

PALATE
A slightly more forward and expressive style from this site.

VINIFICATION
The fruit is hand-picked to insure only clean, healthy bunches are selected. We then whole bunch press, and settle the juice overnight in tank. This is followed by a light racking directly to barrel (approx. 95% solids), where natural fermentation takes place. MLF is not encouraged and wines are sulphured directly after primary.

MATURATION
Matured for 10 months in 30% new (225-500L) French oak barrels.

TECHNICAL ANALYSIS
pH: 3.20
Acidity: 6.3 g/L

REGION
The D'Aloisio Vineyard is located in the Seville Township, with a north facing slope on red volcanic soils. The site has an altitude of 230m above sea level. Clone is I10V1.
